

For fully automatic grinding of single, double and compound bevels with CBN-quality

Flexible circular knife support with encoder

Main Advantages:

- Unbeatable price, to take the first step into CNC knife grinding technology
- High surface quality and short grinding times due to CNC control in combination with CBN-grinding wheels
- Easy data input due to menu guidance

Special Features:

- For resharpening of circular knives
- Grinding of one or two bevels as well as compound bevels
- Knife speed infinitely variable
- Complete grinding in one set-up
- All servo drives fully digital
- Flexible knife support
- External high-pressure coolant facility

Technical Data:

Knife diameter	up to approx. 400 mm
Knife speed (depending on equipment)	up to approx. 900 rpm
CBN-grinding wheel	150 mm Ø
Coolant facility	6 bar - 30 l/min.
Grinding wheel drive	2,2 kW
Measurements L x W x H	approx. 1730 x 1200 x 1800 mm
Weight net / gross	approx. 950 / 1100 kg
